

Please allow there to be open democratic debate over the issue at hand. To potentially allow one company or possibly one individual to singularly dominate an entire media outlet would have devastating effects on the state of our society and would defeat the purpose of living in democracy for the people as well as the function of the FCC. As I understand, the citizens of this nation allow the media to utilize our airspace and we should not allow one entity to monopolize our media outlets and potentially destroy the concept of freedom of press.
